Convenient and sturdy  
advanced robotics

## ***L-Series***

## Freeing up your time

Finding a long lost remote control, getting a beer from the fridge, doing the laundry – all different everyday mundane task can now be avoided with the L-SERIES robots. These bots can get around furniture, avoid the dog's tail, and watch out for children. No longer will you have to waste time looking through the entire apartment for your keys. Equipped with partnered sensors, these bots are able to learn fast and repeat tasks with perfection.

## Strong and capable

With their rugged build, these robots can take on long falls or spilt milk. An L-SERIES robot once fell down a flight of stairs in a home, but was able to upright itself and continue on with its assigned task. Electronics getting damaged from liquids is now in the past. You can drench them with a super soaker and they'd keep on kicking without the slightest glitch.

## Easier than ever to control

The central control panel is no bigger than a small laptop and can be mounted to a wall or kept in a drawer when not in use. The buttons have been simplified so the least tech-savvy person can quickly learn the configurations. Partnered with the robot's ability to learn and remember previous tasks, being able to manipulate the bot to do what you want has never been easier.

**"The LAZI robot has helped me get more free time to spend with my kids. Now I can watch them play video games all day long."** –

*Justin Sane, NY*

**Delivery Man Interceptor:** LAZI has specially designed hands perfect for grabbing bags of food with a voice activated "Thank you" response.

**Dog Walking Companion:** Don't worry about taking the dog out in the rain; LAZI will do it for you. Just program in the route you want him to follow.

**Laundry Doer:** With color depicting sensors, LAZI can sort your clothes into whites, darks, and colors without a hitch. You'll be smelling laundry fresh in no time.

**Drink Fetcher:** Just say the drink you want and LAZI will use his voice-command system, paired with his visual recognition, and bring you that ice-cold refresher.

**Watertight seals:** Don't worry about spilling orange juice on LAZI. It'll run off of his sleek and waterproof design. No more water damaged electronics.

**Specialized Sensors:** His eyes can distinguish colors and patterns, making him easy to "train." Distance sensors in his feet help LAZI avoid obstacles with grace. Vibration Sensors in his hands add a "feel" sensation that LAZI uses to differentiate objects. Lastly, a mini GPS allows LAZI to associate certain tasks with certain areas of the house, whether it be where the laundry room is or what route to take the dog on.

**Multiple Language Settings:** Compatible with English, Spanish, French, Chinese, Japanese, and Slang.

**Self-recharging:** Using his built in solar receptors, LAZI can recharge himself easily and quickly by sitting near a window. This feature's high sensitivity means he can charge up even on the cloudiest of days or even by moonlight.

"This new robot is great! Now I can have a dog without worrying about the mess!"

– *Poodles R. Qute, MA*

"My kids love that they don't have to pause the movie to get the Chinese food. Thanks LAZI!"

– *Jan U. Airy, TX*

"My wife can't yell at me anymore for messing up the laundry."

– *Sam Witch, MI*
